

## How to make... your own **Mobius strip**

1. Cut off the strip of paper down the side of this sheet.
2. Twist it once and glue the ends together.
3. No, that's it, you're done.

But now you've made your Mobius strip, there are loads more things you can do with it...

1. Try colouring along the edge. What happens?
2. Draw coloured lines along the middle. What happens to them?
3. (You may want to make another Mobius strip for this). Draw a line down the middle of your Mobius strip. Cut along the line. What happens?
4. Try drawing a line a third of the way into your Mobius strip. Cut along that. What happens?
