

How to make
your own
tetrahedron – a
shape made of
four triangles

1. Colour and decorate the shapes opposite
2. Cut out along the outside line – ask an adult if you need help
3. Fold all the inside lines away from you.
4. Can you see how the shape will look? Have a look at the example.
5. Stick the tabs down to hold it in place... feel free to ask for help.
