

# Maths Glasses Template

## What to do:

Complete the maths glasses by drawing your favourite shape (you could use some mathematical equipment like a ruler or a compass or you may prefer to draw around an object in your home like a cup or a box).

**Don't forget to draw the same (smaller) shape inside!**

Decorate your maths glasses.

- Shapes, numbers and patterns will work well!
- Will your decoration be symmetrical?

Now cut out the pieces and fold along the dotted lines.

Stick the folded ends to the Toast tabs!

**Pop on your maths glasses and see maths everywhere around you!**
