Make a Star

1. Cut out the triangles.

2. Stick one on top of the other to make a star.

3. Decorate your star!

Ask your friends to make some stars.

Take the stars outside and place them at different points on the school playground, park or lampposts along your street.

Challenge:

Can you make a star out of sticks?

What do you notice about the stars that are furthest away from you?

What does this tell you about the stars in the sky?
